

One in Christ

Learning about God

The booklet about Jesus re-tells the lessons of Holy Week and Christ's redemptive work for us on the cross.

We will move quickly through this book so we can complete our last unit on Telling About Jesus. The memory verses for this unit are on yellow paper. There is only one more unit after this to complete all 36 verses. The class will be gluing these verses into a notebook that will be sent home with them in June. Review of these verses would be a good summer activity!

Make a joyful noise unto the Lord

Theme Verse 2017-2018: "Listen my son, and be wise, and keep your heart on the right path." Proverbs 23:19

Reading Goals

This week we will read about "Alexander Graham Bell." The class will be reading independently in their readers and read a poem about machines. The phonics lessons will be on the sound of *aw* and *au* and the sound of *short e* as made by *ea*. The spelling list is attached.

This week I will be assessing the students individually on the DIBELS assessment. This assessment will show the growth each child has made in phonics, and therefore, reading. These scores will be reported with the report card in June.

Math

Math this week will begin with measuring and drawing line segments to the nearest centimeter, identifying geometric solids, taking a fact and written assessment, and learning new subtraction facts and identifying a fractional part of a set.

Science

This week the class will learn about Space. Where does our planet fit in the planet line up? God is amazing and we see it even in outer space!
