## Math and Science

**Math:** This week, we will identify pairs, graph pieces used to cover a design, read a graph, have our 12<sup>th</sup> assessment, writing money amounts and paying for items using dimes and pennies. Money is a theme this week!

**Science:** We've learned that all insects have 3 main body parts, six legs, and antennae! We also know that a spider is not classified as an insect; they are arachnids! We've learned a song to help us remember important insect characteristics!
