

Happy Campers News

language arts

This week, we started reading about another animal and its home. In addition to learning about Hermit Crab growing and moving to a new home, we learned about animals in the pond. We also learned about how ponds and oceans are different. We have finished taking a quick walk through the alphabet to recognize the letters, now we will focus on letters one at a time and learn how they sound as they blend into words. Our letter this week is M.

Upcoming events

Oct. 12 Bring your parent to school day
Oct. 17 MSU/U of M Spirit Day
Oct. 18 and 19 No School
Teachers at MANS conference

looking ahead to...

- Phonics Sound:** /M?, rhyming, syllables
- Reading:** simple books with patterns in text
- Math:** circles, rectangles, ordering numbers, graphing, attributes
- Science/Social Studies:** ponds, beavers, frogs
- Bible:** God Blesses Abraham

Heintz Sight

We have recently finished reading about Adam and Eve in the bible. Did you ever notice that the first human relationship in the bible is not a mother and child, but a husband and wife. God established His relationship with Adam and Eve as a priority but also made the husband/wife relationship the first, a priority. Make sure to take time to be husband and wife—and let your kids know that relationship is a priority. For the single parent, God is the perfect best friend. Make sure your kids know you rely on Him!

Math

This week in math, we covered designs with pattern blocks, sorted by color and made a graph and acted out story problems.

Bible Lessons around the Fire

This week we learned about Noah (Genesis 6:9-17). Because of sin, God destroyed the world with a great flood. But, in His mercy God saved Noah and His family and gave humankind a second chance. Thank you God for second chances and rainbows to remind us of your promise.
