

# News from the Classroom

Mrs. Worm 1<sup>st</sup> grade 2018-2019  
Week 13

## Math + Science

Math: We have been working hard on our math equations! Adding zero and one have been introduced and practiced. This week we will be working on “counting backwards” by one or subtracting one. Please continue to keep your child practicing at home with the homework ☺

Science: BIRDS! We will have a bird presenter coming on Thursday to share his knowledge about birds! This coincides with our unit perfectly!

## Language Focus

Opinions, opinions!

We will be writing a formal opinion about the character in the book we’ve been reading. Your child will form an opinion, support it with text, and write it all down! We continue to add on to our vocabulary and reading practice.

Spelling List 10: (Short vowel sounds) gap, not, red, sun, jog, fix, web, can, him, bud

## Show and Tell + extra

For Friday, I would like to have your child bring in something of their choice. We are practicing opinions and I will ask prompting questions to bring out some opinions about their object ☺

Looking back on PT conferences, I just want to thank you and celebrate the communication that took place. I am so thankful you all chose to be a part of a Lutheran school where we can focus, not only on academics, but how to equip our children to let Christ’s love can shine through. If you desire to talk more, please contact me!
