

News from the Classroom

Math + Science

Math: Last week of school, we were introduced to quite a few concepts. We will be adding on to those ideas by continuing to use our rulers to measure, order events in a sequence, and make predictions based on what we already know!

Science: What's the weather?! Does your child know the difference between weather and seasons? We will visit that questions and learn more about seasons and weather with new unit. Our show and tell theme centers around science this week 😊

Mrs. Worm 1st grade 2018-2019

Week 31

Language Focus

We are continuing with King Kafu. We have been distinguishing between reality and fantasy, and that sometimes, there are facts within fiction! This week, we will be focusing on our reading skills and interpreting text.

We will also be working toward writing a story. I hope to go through the whole process: Pre-writing, first draft, editing, then final draft. We will do it in steps, so your child will feel so accomplished when they have something that could be “published” 😊

***Spelling:** cow, plow, brown, town, tower, clown, how, wow, bow, owl

*Library Wednesday

Extra News

I hope you had a wonderful Spring break! If you get a chance, ask your child about our resurrection eggs in preparation for Easter!

April 19th: NO SCHOOL (Good Friday) April 21st: EASTER

Show and Tell: Bring in something from a specific season. See if we can guess what season you would use it in!

Report cards will be sent home this Friday!
